

Barrel Adaptor with plain fitting.

Thank you for your purchase. Please read these instructions before fitting.

Your package should contain –

- 1 off Barrel Adaptor.
- 1 off 1.5mm allen key

Safety first.

Observe safe practices when handling your rifle and follow the manufacturer's safety instructions when doing so.

Take extra care when working on your rifle.

Ensure that the rifle has the safety catch is set to safe and is absolutely not loaded with pellets and the area is safe.

Important - Fitting the stripper should not require any force and be a smooth sliding fit on the barrel or easy to turn on to the thread.

1. Before fitting, please check the outside and end of the barrel is free from any marks, scuffs or burrs of any kind.

If the end of the barrel is not completely smooth the adaptor may get stuck and may require force

- to remove it again damaging the adaptor, barrel or both.
- If any marks are present they should be very carefully removed with fine emery or a fine abrasive stone.
2. Apply a thin covering of light oil on the end of the barrel where the adaptor will fit.
 3. Gently slide the adaptor in to position – no force should be needed. Don't force it!
 4. Gently 'nip' the locating grub screws and you're done.
