

QD mount for accessory Rail.

Thank you for your purchase. Please read these instructions before fitting.

Your package should contain –

- 1 off QD mount
- 1 off 2mm allen key

Safety first.

Observe safe practices when handling your rifle and follow the manufacturer's safety instructions when doing so.

Take extra care when working on your rifle.

Ensure that the rifle has the safety catch is set to safe and is absolutely not loaded with pellets and the area is safe.

The QD mount is primarily designed to mount bipods to the underside of the rifle.

Slide the QD mount in to the rail to the required position, tighten the locating grub screws and you're done.

The mount may also be used to attach a sling although we strongly advise you to follow the following additional fitting steps.

1. Position the mount in the rail at the required position and tighten one of the grubs screws.
2. Remove the second screw and using a 3.0mm drill, drill a detent in to the rail about 1.0 to 2.0mm deep. Take care not to drill too deep through the rail.
3. Re fit the grub screw and repeat the detent procedure in the other grub screw position.
4. Tighten the 2 screws fully.

When using a sling frequently check the mount has not worked loose.
