

Replacement Barrel Band for the Air Arms S200 Rifle.

Thank you for your purchase.
Your pack should contain -

1 off Aluminium Barrel Band.

Safety first.

Observe safe practices when handling your rifle and follow the manufacturer's safety instructions when doing so. Check your rifle is not loaded and is de-cocked when ever working on it.

Installation.

1. Remove silencer.
2. Remove the air filler cap.

3. Remove the retaining screw holding the factory fitted barrel band from the underside of the stock.

4. Ease off the factory fitted barrel band and place to one side.

5. Apply a small amount of light gun oil to the outside end of the barrel and to the 'o' ring on the Rowan Engineering barrel band to aid its fitting.

6. Take the Rowan Engineering barrel band and with the chamfered edges facing away from the stock, gently press it over the end of the barrel making a side to side / rotating motion as doing so.

7. Push the barrel band fully along the barrel and over the air tube.

8. Re-fit the retaining screw.

9. Re-fit your silencer and filler cap.
